Disclaimer: There is no Cash Advance Fee. Interest for Cash Advance transactions is calculated daily. The APR for Cash Advances ranges from 9.99% to 17.99%, depending on your creditworthiness. INTEREST AND FINANCE CHARGES: We begin charging interest on purchases as soon as the transaction is posted to your account. For cash advances and balance transfers, interest starts on the transaction date or the first day of the billing cycle in which the transaction is posted to your account, whichever is later. However, we will not charge interest on new purchases if your account had a zero or credit balance at the beginning of that billing cycle, or if you paid the entire new balance on the previous cycle's billing statement by the Payment Due Date. To avoid additional finance charges on purchases, the entire new balance must be paid by the Payment Due Date listed on the billing statement.
